

# CupixWorks

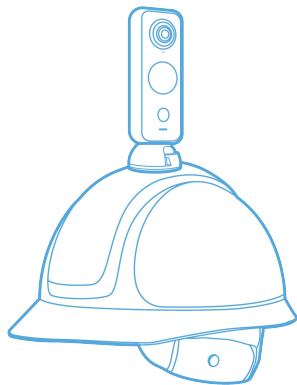

## Standard Hardware Guide

2022 Version 1.4

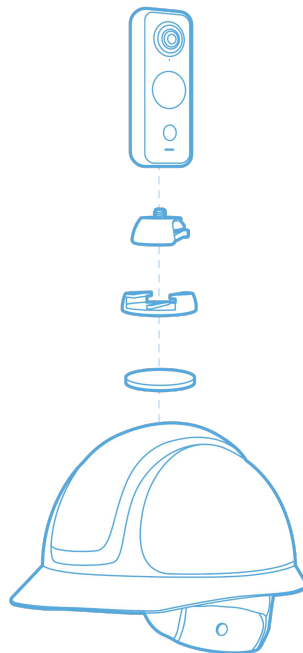

# Helmet

The Helmet setup allows for quick, convenient site capture. The camera is attached to the helmet with a mount and riser (can be detached). Start by watching the [Inserting the Suspension video](#), and then come back here to finish.

Setup

**A** Helmet

**B** Sticker

**C** Mount  
(Top + Base)

**D** Camera

## When to use?

- Use the helmet as the default option for most site captures.

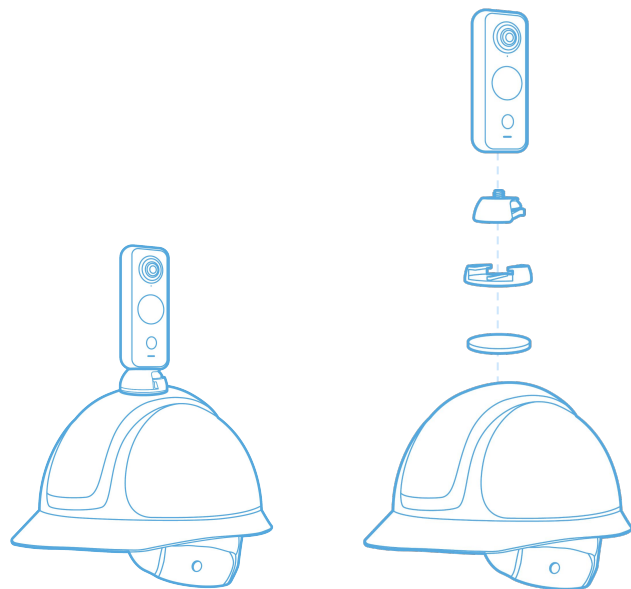

## Advantages

- Hands free mobility.
- Capture at a consistent height for high quality tours.

## Note

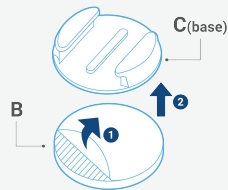

- Danger of camera hitting doorways and other obstacles.
- We recommend mounting the camera so that the lenses are sideways.

# Helmet

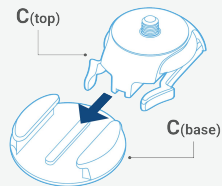

Setup

## Step 1

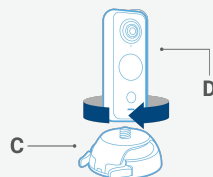

1. Remove the first cover from the Sticker (B). 2. Apply it to bottom of Mount Base (C base).

## Step 2

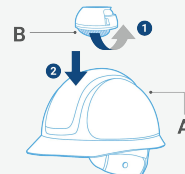

Slide Mount Top (C top) into Mount Base (C base).

## Step 3

Screw the Camera (D) into the Mount (C).

## Step 4

1. Remove the second cover from the Sticker (B). 2. Attach the completed assembly to the top of the Helmet (A).

**A** Helmet

**B** Sticker

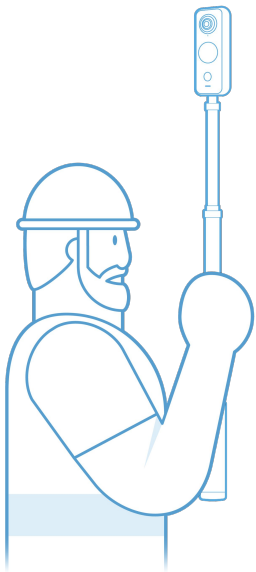

**C** Mount  
(Top + Base)

**D** Camera

# Selfie-stick

The selfie-stick is a lightweight, easy to use option. Just attach the camera to the selfie-stick, and capture the site as you walk.

Setup

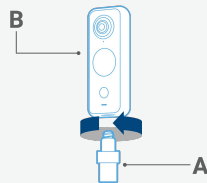

**A** Selfie-stick

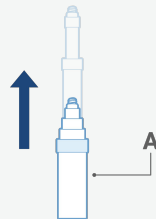

**B** Camera

## Step 1

Screw the Camera (B) into the Selfie-stick (A).

## Step 2

Extend the Selfie-stick (A) with Camera to required length.

## When to use?

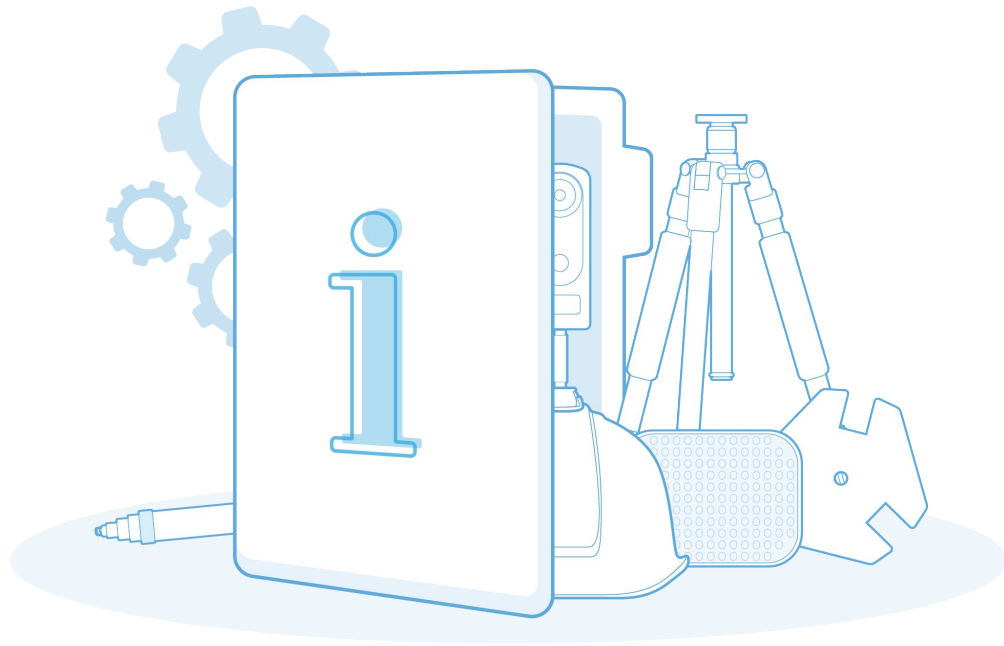

- Use when you need to get into higher, or hard to reach, areas.

## Advantages

- Extends up to ~5 feet.
- Lightweight (weighs 0.43kg / 0.95lbs.).

## Note

- Keep the camera at least 6 inches directly above your head.
- Keep it stable to avoid motion blur.
