

User Guide for the Best Practice

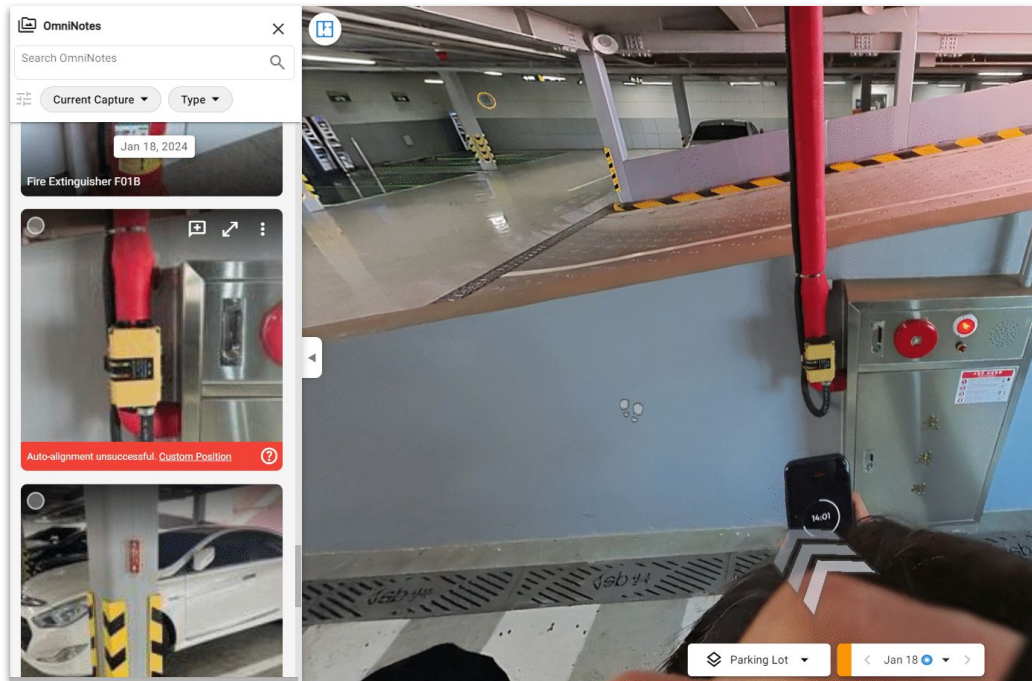

Accessories for OmniNote

For safety and to prevent dropping your phone, we suggest using a **Phone Grip** or a **Neck Strap**

Manual Photo Alignment is Allowed

- When you don't like auto-alignment result.
- When auto-alignment was not successful. [Why does this happen?](#)

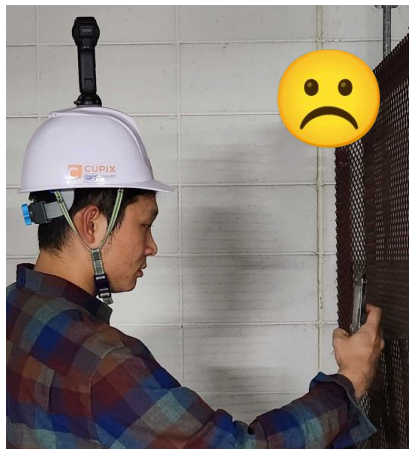

Best Practices for Improving Auto-Alignment

Take photos comfortably, without reaching out too far or getting too close to the subject

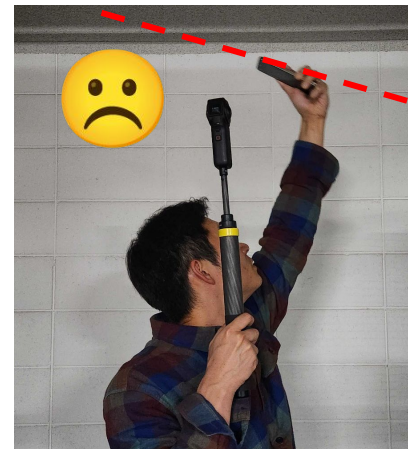

Not Recommended Practices for Auto-Alignment

**Being too close to the
subject**

**Fully extending
your arm**

**Near parallel
to Ceiling or Floor**

Still Want Close-Up Photos?

Rest Assured When Photos Are Not Auto-Aligned

- Don't be concerned if OmniNotes don't auto-align; this is not a problem. You have the option to adjust the positioning in 3D yourself or use the image as is.
- Grouping allows you to easily associate photos with their relevant equipment for annotations and other activities.
- Go ahead and take close-up shots of **nameplates** and maneuver around equipment to capture **detailed labels**.
